SKILL SKANNER: Extract & Compare Skills

- **2.6k** online **data scientist job postings** collected
- **21.5k** extracted **bullet points** likely to be skills

What You'll Do:

- Design, develop and test data science pipelines for a variety of projects to help make informed decisions impacting the business.
- Producing reliable predictive insights, based on statistical modeling and/or machine learning methodologies.
- Approaching data with the aim to increase and maximize performance marketing KPIs such as retention acquisition.
- Analyzing internal datasets, to better understand our customer behavior to support business decisions.
- Collaborate with the Data Engineers, Product Owner, and the marketing team on refining and scoping requirements.
- Working with the marketing team on building use cases, defining hypotheses, and building a measurement framework in order to test the models.

Tech Stack:

- AWS / Elastic Beanstalk
- Docker / Terraform
- Python / Django
- PostgreSQL
- Redis
- ElasticSearch
